

The AI Scientific Community for neural operator discovery

(a) Inside one lab, one iteration

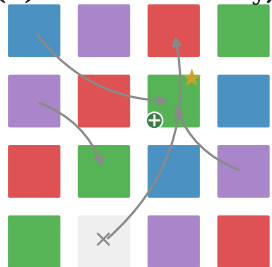

one of $N = 16$ labs

votes update trust; history + global best inform the next plan

ablation: planner + reviewer = LLM (gemma3:12b) ↔ PSO rules

(b) The community, $t = 1 \dots 20$

arrows = citation votes; ★ = global best
influential labs breed (+); uncited labs
are culled (×) and replaced
cell color = seed paradigm
